CUSTOM GOBOS FROM APOLLO

Light Up YOUR WEDDING

With Custom Gobos from Apollo

Lighting can completely transform your venue from ordinary to spectacular. It has a powerful impact on the overall feel of your wedding and the mood of your guests.

Make the entire venue a canvas that reflects your décor. Project patterns and color on the wall, floor and ceiling with patterns from our wedding collection to make certain areas of the room focal points. A custom gobo that projects your name or monogram on the dance floor or the wall behind the head table creates an impressive effect that will look amazing in your wedding photos.

To create your wedding gobo, choose a design and font from our collection. We can also create a one-of-a-kind gobo using your engagement photo, invitation, or your own artwork.

Gobos are a cost effective way to transform your wedding venue and wow your guests.

Put your name in lights with a custom gobo from Apollo.

Creating a Custom Gobo is Easy

STEP ONE

Choose a Design

STEP TWO

Choose a Font

Things to Know Before You Order

Bride Name: _____

Groom Name: _____

Wedding Date: _____

Template: _____

Font: _____

Lighting Fixture¹: _____

¹ In order to project your gobo design, you will need a gobo projector / lighting fixture. There are hundreds of different lighting fixtures. The size of a gobo is dependent on the lighting fixture being used. Typically, venue, event coordinator, DJ or lighting designer provide the lighting fixtures. Ask them to provide the name and model of the fixture.

Metal Gobos

The design is laser cut out of 8 mil stainless steel allowing light to shine through and project a white pattern on the surface. A color filter can be added to the fixture if color is desired. All metal designs can be ordered as SuperResolution® glass. See ApolloDesign.net for additional designs.

Bridging

Metal gobos require "bridging" which are very small lines that connect the internal structure of letters and designs. If bridging is not added, enclosed areas, such as the inside of the letter "O", would fall out. It's like carving a pumpkin.

In order to ensure the highest quality, some patterns cannot be produced in a particular size or substrate.
